Work Experience

React JS Developer (March 2023 – present)
Freelance | Remotely

Projects

CopoNice Website (December 2023 – January 2024)   Link
"Coponice" is a site that offers discounts on various products and services. Users can **search** for coupons and special offers from different stores and use them to get discounts when buying online. The site aims to provide opportunities for consumers to save money and get good deals when shopping online.

- Optimizing web pages for maximum speed and scalability.
- Authentication, Authorization and protected pages
- It is easy to use and manage website through a **control panel.**
- Connected Back-End APIs to display data using the Custom Components, Library Components, and Redux.
- Improved work mechanisms to stay up to date with latest technologies

Kohli-Fonts Website (May 2023 – July 2023)   Link
It is a website for selling fonts, which can be used in graphic design, advertising, and other fields.
It caters to the needs of designers, artists, and companies in need of unique and attractive fonts, Additionally, the website has a support team that can be contacted for assistance.

Happy Shop Website (July 2023)   Link
It is an e-commerce website that allows users to purchase products online. These platforms provide a convenient and easy shopping experience for users, where they can easily and quickly search for the products and services they need, and buy them with just one click.
Tech Stack: Formik, Yup, SwiperJS.

- an e-commerce website for selling many categories using React JS and Redux
- Contain a home page where the products show and it has a filter to filter the products
- Contain a cart section where the choosing product will add to the cart with full configuration control.

MED-SAL Website (September 2023 – October 2023)   Link
I analyzed the system connects patients with doctors and pharmacies, with features like location-based filtering and Google Maps for deliveries, along with Cloud payments.
ERD Diagram, Database Diagram, Use-Case Diagram, Activity Diagram.

Education

Aleppo University
(October 2017 – January 2023)

Bachelor's Degree in Informatics Engineering.
Grade: 85.711% Excellent

Skills

Programming Languages:
JavaScript, TypeScript, C++.

Frameworks, and services:
ReactJS, NextJS
React Redux Toolkit,
React-Router-dom,
React Redux Toolkit Query,
Bootstrap, Tailwind-CSS, Axios,
tw-elements, Material UI,
headless UI, Shadcn UI
Vite, Formik, Yup, Zod
NextAuth.js, Clerk, Prisma
React-Hook-Form, SwiperJS,
TanStack Query, EmailJs.

Concepts:
- Git (Github, Gitlab)
- Clean Architecture
- Design System
- Clean Code
- Problem Solving
- RESTful API
- Command Line
- Systems Analysis
- Databases.
- Search Engine Optimization SEO
- Object Oriented Programming OOP

Languages

Arabic: native
English: limited working proficiency
